## ALL SOULS COLLEGE

EQUALITY REPORT FOR 2023
(to January 2023)

## Introduction

Equality, diversity and inclusion are essential to our College, and as a Higher Education Institution, we have specific equality responsibilities. Our goal is to promote equality and increase representation from under-represented groups, specifically women and Black, Asian and minority ethnic groups and provide them with an opportunity to thrive.
Our duty is to provide annual equality data and assess and publish precise and quantifiable equality goals every year.

The Report:
(i) incorporates the gender statistics (Tables 1) on current Fellowship and of recent elections (Table 2 ) and equality monitoring (Table 3) of recent elections; these tables are updated regularly on the College website;
(ii) reviews the College's performance against the Equality Objectives it agreed and published in March 2020 in accordance with the requirements of the Equality Act 2010;
(iii) reviews more generally the College's progress in fulfilling its duties under the Equality Act and in accordance with its Equality Policy.

## Progress against Objectives agreed in 2020

## Objective 1:

To continue to promote and publicise the College's efforts towards achieving a more diverse Fellowship with the aim of increasing the number of high quality applicants from underrepresented groups, particularly women ${ }^{1}$ and $B A M E^{2}$, and a range of backgrounds while retaining the College's strong commitment to election solely on merit.

The All Souls Open Evening for Women ran on 11 March 2022 and the next one will take place on 3 March 2023. The open evening to encourage applications from Black, Asian and minority ethnic groups took place on Friday, 27 May 2022. The 2023 BAME open evening will take place in Trinity Term.
With regard to the Post-Doctoral Fellowship elections, all those involved with the Fellowship competition are acutely conscious of the need to avoid any implicit or accidental bias, and they critically review the processes and progression statistics for each stage of the competition.

[^0]Overall, the proportion of female Governing Body Fellows has increased from 29.5\% of the Fellowship in January 2016 to $38.5 \%$ in January 2023 (Table 1); down from $41.3 \%$ in January 2022. The $2.8 \%$ decrease from 2022 to 2023 is due to six male and one female Fellow being admitted in 2022 and to the departure of four male and five female Fellows (nine in total). As gender balance can be affected by both arrivals and departure from Fellowship and, given the small numbers involved and the College's strong commitment to election solely on merit, the direction and rate of change is variable.

With regard to the Examination Fellowship, the percentage of female applicants has increased from $25.9 \%$ in 2006 to $41.7 \%$ in 2022 (Table 2). The proportion of female applicants varies across time with peaks in 2008 ( $43.1 \%$ ) and 2014 ( $42.7 \%$ ). Between 2006 and 2022, 31 EFs have been elected of whom 20 were male and 11 were female. In 2022 the success rate of the female applicants was $0.9 \%$ against a success rate of $0.7 \%$ for the male applicants.

Regarding the Post-Doctoral Research Fellowship, the percentage of female applicants has decreased from $50 \%$ in 2006-07 to $41.3 \%$ in 2022-23 (Table 2) which is however, considerably higher than in 2020-21 (28.5\%). Of the female applicants in 2022-23, 25.7\% applied in History of Art, or Music, or Science, $17 \%$ applied in History post 1800, $26.7 \%$ applied in Social Anthropology, $3.9 \%$ applied in mathematics and $26.7 \%$ in Life or Environmental Science. The number of female applicants varies across time with peaks in 2006-07 (50\%) and 2018-19 ( $45.7 \%$ ). Between 2006 and 2023, 41 PDRFs have been elected of whom 22 were male and 19 were female. In 2023 the success rate of the female applicants was $2.1 \%$ against a success rate of $0.8 \%$ for the male applicants.
In the Visiting Fellowship competition for the academic year 2023-24, the percentage of female applicants has increased from $24.7 \%$ in 2006 to $39 \%$ in 2022. Of the female applicants $15.4 \%$ were successful against $18 \%$ of the male applicants. (Table 2)
The College's Fellowship competitions continue to attract a substantial number of BAME applicants with $44.6 \%$ of Examination Fellowship candidates, $45.5 \%$ of Post-Doctoral Research Fellowship candidates and $45 \%$ of Visiting Fellowship applicants being from BAME in the 2022/23 competitions. (Table 3)

The College has been hosting the TORCH Global South Visiting Professor annually in Michaelmas Term.

## Objective 2:

To review and where possible improve the collection and analysis of data on applicants for College Fellowships and staff posts in order to inform the ongoing critical review of our policies and procedures for Fellowship election and staff appointments in support of achieving a more diverse Fellowship and staff.

For data protection reasons, we would usually publish such data every four years, when objectives are being reviewed. The College's General Purposes Committee has critically reviewed each year the gender and ethnicity data on Fellowship and staff appointment applications. The available disability data has so far not been included in the reports, this is for consideration by the GPC. This cumulative Fellowship data on the ethnic background of candidates for the College's main competitions is now incorporated in Table 3, which shows
that this year fewer than $1 \%$ of candidates declined to supply this information. This compares favourably with previous years.

## Objective 3

To hold biennial reviews of College Fellowships in relation to issues of diversity and accessibility, taking turns to consider the four main categories - Senior Research, Postdoctoral, Examination and Visiting Fellowships - and to continue to monitor success rates and procedures.

GPC decided that a comprehensive review of the Senior Research Fellowship is due to take place once administrative capacity is in place.

## Objective 4

To take appropriate steps, including the periodic review of all relevant policies, procedures and training arrangements, to improve the understanding of all members of the College community about equality principles and issues such as unconscious bias in all aspects of College life.
The College takes equality and diversity factors into careful consideration as it plans and conducts each Fellowship election. It also undertakes a critical post-election review of its procedures and process after each election to identify scope for improvement, particularly in relation to diversity. In addition to the annual review of overall equality statistics and review of progress against the College's equality objectives, the College's Diversity Fellows prepare an annual report providing more qualitative evaluation of the extent to which equality principles are reflected in day-to-day discourse and conduct within the College.

## Objective 5

To continue to improve the accessibility of College buildings and facilities to those with physical disabilities.

Since the last report, measures taken to improve accessibility include the installation of a new ramp to the Ante Room of the College Library and of handrails in bathrooms (project in progress).
R. K. D.

Domestic Bursar
2.iii. 2023

Table 1

## Gender Breakdown of Current Fellows

(As at January 2023)

| Fellowship Category | Male |  | Female |  | Total |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | No | $\%$ | No | \% |  |
| Examination Fellow ${ }^{1}$ | 8 | $66.7 \%$ | 4 | $33.3 \%$ | 12 |
| Post-Doctoral Research Fellowships | 5 | $55.6 \%$ | 4 | $44.4 \%$ | 9 |
| Senior Research Fellowship | 11 | $55.0 \%$ | 9 | $45.0 \%$ | 20 |
| Extraordinary Research Fellowship | 0 | $0.0 \%$ | 0 | $0.0 \%$ | 0 |
| Two-Year Fellowship | 2 | $100.0 \%$ | 0 | $0.0 \%$ | 2 |
| Official Fellows ${ }^{2}$ | 3 | $75.0 \%$ | 1 | $25.0 \%$ | 4 |
| Fifty-Pound Fellowships | 6 | $60.0 \%$ | 4 | $40.0 \%$ | 10 |
| Distinguished Fellowships | 4 | $80.0 \%$ | 1 | $20.0 \%$ | 5 |
| University Academic | 9 | $56.3 \%$ | 7 | $43.8 \%$ | 16 |
| Total | $\mathbf{4 8}$ | $\mathbf{6 1 . 5 \%}$ | $\mathbf{3 0}$ | $\mathbf{3 8 . 5 \%}$ | $\mathbf{7 8}$ |
| Visiting Fellowships | 4 | $50.0 \%$ | 4 | $50.0 \%$ | 8 |

## Notes

1. White includes all those declaring themselves to be from white British and other white ethnic backgrounds.
2. BAME includes all those declaring themselves to be from Black, Asian or other ethnic minority groups, including mixed.
3. There was a very low response rate to the 2009 equality monitoring exercise which was paper based; the

White totals for this competition should therefore be regarded with considerable caution.
4. Data is not available on the ethnic background of Fellows elected before 2011, SRF elections only from
N.B. The percentages displayed are of the total number of eligible applicants (and, in the case of Examination Fellowship candidates, completing the examinations) and NOT a percentage of those answering the question, e.g. the percentages for White and BME for SRF 2013-14 is $84 \%$ and $16 \%$ for those answering the question.
