Notes

1. White includes all those declaring themselves to be from white British and other white ethnic backgrounds.
2. BME includes all those declaring themselves to be from black or other ethnic minority groups, including mixed.
3. There was a very low response rate to the 2009 equality monitoring exercise which was paper based; the White totals for this competition should therefore be regarded with considerable caution.
4. Data is not available on the ethnic background of Fellows elected before 2011, SRF elections only from 2013.

**N.B.** The percentages displayed are of the total number of eligible applicants (and, in the case of Examination Fellowship candidates, completing the examinations) and NOT a percentage of those answering the question, e.g. the percentages for White and BME for SRF 2013-14 is 84% and 16% for those answering the question.
